

ONBASE FOR AEROSPACE AND DEFENSE

FAA
Approved
Solution

15+
A&D Solutions in Production

50+
A&D Customers Worldwide

OnBase, a globally recognized and awarded enterprise content management (ECM) solution, is used by more than 50 Aerospace and Defense (A&D) organizations worldwide to manage regulatory requirements and prove compliance, traceability and quality control.

In Sync with Industry Needs

Flexibility and adaptability are two key features of OnBase; similarly, these characteristics drive the evolution of A&D organizations, and are often predictors for continued success and growth. It's not enough to react; companies must anticipate the next adjustment whether that means constantly changing regulations, expanding capabilities or disruptions in the supply chain. The tremendous volume of documents recorded, tracked and referred to means a paper-based system is not reliable and, in fact, can be detrimental to the life of an organization.

Traceability is instrumental within A&D manufacturing organizations. OnBase allows you to easily document and track every step of the manufacturing process, providing instant access to the complete record of a component from design specifications and variances to the materials used, source, tooling, inspection, packaging, shipping and customer receipt.

Regulatory Compliance is a necessary, yet weighty constant in the manufacturing and maintenance segments of the A&D industry. As an FAA-approved solution, OnBase is deployed to easily and thoroughly capture methodology, process, activity, testing and results.

Audits, common yet consuming, are easier to conduct because of electronic access to documents, logs and information, allowing organizations to maintain business continuity.

Contract Management becomes manageable and controlled by automating predictable steps while empowering staff to complete higher importance, knowledge-driven work. This functionality, coupled with unsurpassed reporting capabilities and dashboard views, improves visibility into the contract lifecycle and eliminates the fragmented views of contract-related information and processes.

50+ AEROSPACE & DEFENSE CUSTOMERS WORLDWIDE

Hyland partners with more than **13,000 customers** across **69 countries**.

Together, with our global network of Authorized OnBase Solution Providers, we are dedicated to helping customers improve business processes and make the most of their technology investments.

PARTNERSHIPS

Hyland partners with industry-leading hardware vendors and software developers to complement our OnBase ECM solution, including:

Strategic Alliance Partners

- Esri
- HP
- Konica Minolta
- Lawson
- Microsoft
- XEROX

Integration Partners

- Autonomy
- Oracle
- PeopleSoft
- SAP

Infrastructure Partners

- Citrix
- VMware

Hardware Partners

Disc Duplication

- Rimage

Scan

- Canon
- Epson
- Fujitsu
- Kodak
- OPEX
